

DE-COMP COMPOSITES, INC.

D3000-10

BREATHER/BLEEDER

D3000-10 is a high denier fiber; non-woven polyester felt which can be used even during volatile evacuation from vacuum bags. This breather can be used at pressures up to 200 psi and temperatures up to 400°F/ 204°C. The material's multidirectional stretch, combined with a low density, light weight construction, enables D3000-10 to conform closely to the contours of the part.

D3000-10 contains no binders that will cause restricted air flow or that will cause adhesion to the part or other component.

PROPERTIES

Maximum Use Temperature	400°F/204°C
Weight (oz/yd ²)	10
Standard Roll Size	60" x 50 Yd 72" x 50 Yd
Color	White

NOTE: Slitting is available upon request.
