

DE-COMP COMPOSITES, INC.

D242

ROTARY CUTTER

D242 is a revolutionary new cutter that is perfect for cutting multiple layers of cloth, film, bleeder, peel ply, graphite and fiberglass without first having to place masking tape on the material.

D242 comes with a razor sharp, replaceable blade that can be mounted on either side for left or right handed use. It also features a blade guard that ensures complete safety for the user.

D242 has a contoured handle that conforms to grip. This shape reduces fatigue by distributing the pressure over a larger area of the hand than conventional rotary cutters.
