

# DE-COMP COMPOSITES, INC.

## D200 TFNP

### RELEASE FABRIC

D200 TFNP is a non-porous PTFE coated, plain weave, fiberglass cloth which will contain and release from commercial resin systems and is resistant to all solvents, adhesives, and resins normally encountered in composite and metal bond fabrication.

D200 TFNP is designed as a release fabric that will prevent resins from bleeding through the release fabric and into the breather material. It can be used on metal bond assemblies to promote proper filleting of the adhesive flash.

D200 TFNP is recommended for flat and simple contoured assemblies.

### PROPERTIES

Tensile Strength (psi)	70
Maximum Use Temperature	550°F/288°C
Weight (oz/yd <sup>2</sup> )	3.3
Standard Roll Size	38" x 100 yd
Color	Beige
