

DE-COMP COMPOSITES, INC.

D200 TFP

RELEASE FABRIC

D200 TFP release fabric is a porous PTFE coated plain weave fiberglass cloth and is resistant to all solvents, adhesives, and resin systems normally encountered in composite and metal bond fabrication.

D200 TFP is designed as a release fabric that will allow excess resin, volatile and trapped air to bleed through the release fabric and be absorbed into the bleeder or vented away from the assembly.

D200 TFP is recommended for flat and simple contoured assemblies.

PROPERTIES

Maximum Use Temperature	550°F/288°C
Weight (oz/yd ²)	1.9
Standard Roll Size	38" x 100 yd 60" x 100 yd
Thickness (inches)	0.003
Color	Light Beige

Note: 80" x 100 yd. rolls are available, subject to a minimum quantity order
